Scan code to find out more:

Automation Apprentice

Gain hands-on experience in working with the equipment and systems in high-tech automated logistics facilities, along with in-depth knowledge of automation systems and high-level programming skills, fixing technical challenges and creating new technical opportunities.

APPRENTICE

International Freight Specialist Apprentice

Organises shipments to move goods from the manufacturer or producer to a market, customer or final point of distribution. Liaises with carriers, ports and handling agents around the world! The work is diverse and exciting, including crucial customs knowledge and a competitive salary.

APPRENTICE

Warehouse operative

You would handle the goods and products in warehouse or stockroom. It would be your job to keep them safe and make sure they are delivered to customers on time.

Security

A Security Officer, or Security Guard, ensures the safety of the area they are assigned to watch. Their duties include monitoring the premises, responding to emergency situations and keeping track of all incidents on-site.

Logistics & distribution manager

Logistics and distribution managers are responsible for getting goods to the right place at the right time.
